- English (Fluent)
- French (Basic)

PROFILE

Enthusiastic Cybersecurity professional with a B.Sc. in Security Studies and experience supporting enterprise security projects. Proven ability to extend Data Loss Prevention solutions, develop SIEM dashboards, and collaborate across IT, legal, and business teams. Adept at translating complex security concepts for non-technical stakeholders and managing security tasks under pressure. Strong analytical thinker, with excellent attention to detail, communication skills, and a commitment to continuous learning.

WORK EXPERIENCE

Associate Data Security Specialist - Betfair   JUNE 2023 - PRESENT

- Supported and extended enterprise Data Loss Prevention capabilities for endpoints and email, significantly improving detection of sensitive data exfiltration. Provided end-user support and training on DLP incidents and policy requirements, improving user compliance and security awareness.
- Collaborated on cross-functional security projects: securing the Office 365 estate and SharePoint environments, deploying Microsoft Purview Data Labeling/Classification, and conducting security gap assessments to identify and remediate vulnerabilities.
- Developed a custom script for Continuous Controls Monitoring of the Endpoint DLP system. Created dashboards in Splunk to track security metrics and alert on anomalies, enabling proactive oversight of compliance and incident trends.
- Gained hands-on experience with key security tools and platforms: Endpoint & Email DLP, Splunk , Cortex XSOAR.

Data Analyst, Sykes/Sitel   Nov 2020 – May 2023

Customer Support Representative, Sykes/Sitel   Oct 2019 – Nov 2020

EDUCATION

B.Sc. in Security Studies, Universitatea Babeș-Bolyai – Cluj-Napoca   2017-2020

CERTIFICATIONS

CompTIA Security+ – Validates foundational cybersecurity knowledge and best practices.

AWS Certified Cloud Practitioner– Demonstrates understanding of cloud concepts and services on AWS.

Cisco CCNA Training Udemy – Completed a comprehensive networking and security course (38 hours) covering networking principles and security technologies.

Hack The Box Academy – Self-directed learning in ethical hacking and cybersecurity labs, reinforcing practical skills in penetration testing and threat analysis.
